Title:	Systems and Method for Data Encryption and Compression (EnCompression)

The Commissioner, US Patent Office
Commissioner for Patents
P.O Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Response to Office Action Regarding Rejection Of Claims 1-30

In response to the Office Action notification on September 28, 2007, which includes a rejection of claims sighting claims already granted to patent US 6,456,744 and US 6,567,781, the applicant elects to object to all the claim rejections. This election has been made sighting a detailed and thorough analysis of the claims issued to both Patents US 6,456,744 and US 6,567,781, comparing them with the claims made by the Applicant in 10/749,024. Detailed response to the Rejection of the Claims in this response highlights the insufficient in-depth analysis and review by the Examiner of the Applicant's patent and that of issued patents. Applicant requests review of Applicant's objection of key differences between Applicant's patent and that of US 6,456,744 and US 6,567,781.

In the following detailed response the patent application number 10/749,024 is referred to as PCPA (Pal Chaudhuri Patent Application) while US patents 6,456,744 and 6,567,781 are referred to as LP (Lafe Patent).
